: for HF when the shack is located on teh second floor?

: Any thoughts or suggestions would eb appreciated.

Herb -

I can't comment on your idea of using wide foil for your ground lead as I  
have no relevant experience. But I can give a word of advice regarding  
resonance in the ground lead itself.

Any ground lead you run will be of a length that will be near to an odd  
number of quarter-wavelengths on one or more bands. On those bands its  
r.f. impedance will be VERY high, nearly an open circuit, so you will  
have no grounding at all on those bands. The solution is to run at least  
two ground leads, of different lengths, in parallel.

Good luck and 73,

Van - W8UOF

For sale, like new ICOM W21AT dual band handie talkie, HM75 remote control speaker mike, CP13 mobile adapter with filter, vinyl case and all manuals and original boxes.

This radio is like brand new, I just no longer need to have two handie talkies. Will ship COD. Price \$375.00 firm. If interested contact
